

Running Routes in Wenatchee

From a base near Columbia Elementary School, I have developed a series of running routes in nearby neighborhoods. These suit my needs for runs varying in time from twenty minutes to over an hour depending upon choice of route and running speed. Residential streets are featured. Availability of crosswalks and/or controlled intersections are considered in routes that cross arterials. Some streets do not have sidewalks; run facing traffic if running on the street surface.

Okanogan, Circle, Fuller, Washington - 4.78 Miles

This route features a close-up view of the foothills south and west of Circle Street. The busiest crossings are at Russell, Orondo, Crawford, each twice. Fuller and Kittitas are used to their full extent, rather than busier Miller and Okanogan.

Fifth, Western, Castlerock, Franklin - 3.68 miles

This somewhat rectangular route uses Fifth and Western as two of its sides, yet avoids traveling more than a few blocks on either of these busy arterials. Miller must be crossed twice, once at 1st at a controlled intersection and also at Idaho, where a crosswalk is available.

Fifth, Western, Cherry, Franklin - 4.16 miles

This route is a longer version of the previous route, extending south as far as Cherry. Miller must be crossed twice, once at 1st at a controlled intersection and also at Idaho, where a crosswalk is available.

Franklin, 5th, Pershing, Millerdale - 4.22 miles

This route features a long north/south section through quiet neighborhood streets of Pershing, Pickens, John, Lowe, and Lambert. Miller is crossed at 1st at a controlled intersection and at Idaho by crosswalk. The northern portion could be varied by following 5th by a longer portion of Wenatchee Valley College.

Franklin, Washington, Western, Castlerock - 2.74 miles

This is one of the shorter routes of the bunch, featuring a long portion of Castlerock. Miller is crossed at a controlled intersection at Washington and at a crosswalk at Idaho.
